SUMMARY

Rigorous **Product Designer** with a multidisciplinary background in **UX/UI Design, Software Development**, and 5+ years of **teaching and research** at the **University of Melbourne**. Previously at a **HealthTech** startup, applying user-centered design to improve accessibility and workflows for clinicians. Skilled at **leveraging user interviews and vibe coding** to improve product experience. Experienced in simplifying complex ideas, spotting patterns in ambiguity, and translating insights into actionable outcomes. A strong collaborator with proven ability to thrive in **agile, cross-functional teams**.

SKILLS

- Research & Analysis:** User interviews, Usability tests, Desk research, Competitor benchmarking, Data synthesis
- Product:** Figma, Framer, Miro, Trello, Jira, Loom, Slack, Teams, Notion, Linear, Granola
- Tech Stack:** Vibe Coding, AI, Claude Code, Codex, Gemini, Python, C, JavaScript, basic SQL, HTML, CSS
- Collaboration & Communication:** Agile methods (Scrum, Kanban), Stakeholder facilitation
- UX/UI Design:** Adobe Creative Suite, Figma, A/B Testing, Prototyping, Design systems, Stich

EDUCATION

UX UI Design, RMIT Online, Victoria Digital Jobs Program

July 2024 – Nov 2024

- Managed end-to-end product design using Figma and Adobe Creative Suite, creating wireframes, prototypes, and design systems informed by user and stakeholder feedback.
- Conducted both quantitative and qualitative research, synthesised findings into actionable insights.

Full Stack Software Engineering, Holberton School Australia

Oct 2023 – Jul 2024

- Developed scalable web apps (React, Node.js, Flask) and collaborated with developers to align technical feasibility with user needs.
- Gained experience working with data structures, agile workflows, and stakeholder communication.

Master of Architecture, University of Melbourne (First Class Honors)

Feb 2020 – Dec 2022

Bachelor of Design, University of Melbourne

Feb 2017 – Dec 2019

EXPERIENCE

Product Design Engineer, [MLAI](#) – [Vibe Raising](#)

Feb 2026 – Present

- Design and Build Vibe Raising, an **AI-native** investor update platform using **Claude Code**, Codex, Figma, Linear, Notion. Presented at Melbourne **Codex** event and secured investor interest ahead of product launch.
- Run **user interviews** and **usability testing** with founders and investors; Synthesise insights into a prioritised roadmap shipped via sprints.

Product Designer, [Support Sorted](#) (MAP-backed Startup)

Jul 2025 – Feb 2026

- Conducted **user interviews with clinicians**, usability sessions, and **competitor analysis** to uncover pain points and inform feature priorities.
- Collaborated on improving the **onboarding process**, **synthesising feedback** into actionable recommendations that **supported clinicians**.

Project Manager & Head of Logistics, Chill Bunny Wellness

Feb 2025 – Jul 2025

Product Manager, [Relish](#) Progressive Web App (Startup)

Feb 2024 – Jul 2024

- Conducted **user interviews and competitor research** to identify gaps in the dining recommendation space.
- Led the **end-to-end process** and synthesised findings into **actionable features**, prioritising stakeholder interests and **technical constraints**.
- Collaborated with developers and product owner, managing **backlog**, running **Scrum ceremonies**, and showcasing **MVP** at **Canva Demo Day**.

Academic Tutor, Melbourne School of Design, University of Melbourne

Jan 2020 – Dec 2024

- Mentored over **3,000 students**, facilitating **technical workshops** to explain complex **design systems** and **computational design concepts**.
- Guided students through **research, problem analysis, and iterative prototyping**, linking theory to real-world applications.
- Facilitated collaborative sessions with students to analyse and apply critical feedback, connecting **design iterations** to **product development**.

PROJECTS

Kinetic A Credit-based Physio Platform: Incentive Design under Adversarial Conditions	2026
Walley Bank – Responsive UI Design for Fintech Service	2025
Relish – Progressive Web App for Dining Recommendation	2024
